---

## Skills

Software development. Independent and collaborative research. Troubleshooting and debugging complex systems. Written and verbal technical communication.

Experienced with: Python (including NumPy, SciPy, Matplotlib, Django), Fortran, bash; git, svn, GitHub; Linux, MacOS; emacs; LaTeX, Markdown/Jekyll, ReST/Sphinx

---

## Experience

### UC Santa Cruz / Postdoctoral Researcher

August 2016 - PRESENT

Developer of the open-source stellar evolution software [MESA](#) (1000+ users)

- Designed and refined testing infrastructure, reducing the time to identify regressions from days to a few hours
- Led migration of version control system from SVN to Git/GitHub, increasing developer productivity and community engagement
- Rearchitected, refactored, and documented microphysics modules, enhancing and extending core capabilities and enabling new kinds of stellar models
- Co-directed annual MESA Summer School and trained over 200 researchers in effective use of the software through intensive, hands-on tutorials

Independent researcher in stellar astrophysics

- Communicated scientific results in 32 peer-reviewed papers (12 first author) and 20 conference and seminar presentations
  - Mentored student researchers, including supervising 2 undergraduate theses
  - Organized 2 international astrophysics conferences (~50 participants) and maintained a world-wide network of collaborators
  - Wrote research proposals attracting \$400k in external funding
- 

## Education

### UC Berkeley / MS & PhD in Physics

August 2009 - May 2016

Award-winning researcher and teacher

- Wrote influential astrophysics thesis describing outcomes of stellar mergers
- Taught 5 physics and astronomy courses at a range of levels, including co-developing a course for non-majors that fused astronomy and biology
- Advanced diversity and inclusion in physics as part of the Compass Project, engaging undergraduates from groups traditionally underrepresented in the physical sciences through project-based courses and a mentoring program

### MIT / BS in Physics

August 2005 - June 2009

---

## Awards

NASA Hubble Fellowship (2016-2019)

National Science Foundation Graduate Research Fellowship (2010-2015)
